A SENIOR LEAD SOFTWARE ENGINEER

Brooklyn, New York

MY PROFILE

As an experienced Senior Full Stack Developer with 16 years in the field, I specialize in developing state-of-the-art web applications using PHP, Laravel, and WordPress. I'm open to senior PHP developer roles, either in-office or remote, on long-term contract or C2C bases. I bring hands-on experience in PHP, Laravel, cloud computing, and microservices. Passionate about leveraging OpenAI's capabilities, including ChatGPT, to drive innovation, enhance AI functionalities, and deliver superior results in dynamic, forward-thinking environments.

SUMMARY

Proven success in managing complex projects efficiently while meeting tight deadlines and budget constraints. Specialized in PHP and Laravel, with deep expertise in JavaScript, CSS, HTML, and MySQL. Skilled in leveraging Python for scripting, developing RESTful APIs, and integrating cloud platforms like AWS, Kubernetes, and Azure into Laravel applications. Adept at leading diverse development teams, managing project tasks, and collaborating with stakeholders to deliver high-quality software solutions that align with business objectives.

Design Principles: SOLID (Single Responsibility, Open/Closed, Liskov Substitution, Interface Segregation, Dependency Inversion), Object Oriented Programming

Expertise:
PHP, JQuery, JavaScript, HTML, CSS, Bootstrap, AngularJS, React, CSS, Shell Scripting, Python, SQL, API, QA, Test/Debugging, Git, AWS, Data Migration, AWS (Lambda, Elastic Beanstalk, EC2, OOP, RDS, S3, IAM), Docker

Databases:
AWS RDS, MySQL, Microsoft SQL. Microsoft Access, IBM DB2, Oracle 11g, MongoDB

Stacks:
Laravel, Livewire, Vue.js Wordpress, LAMP, Linux, Red Hat, Z/OS, Microsoft Windows Server

Methodologies:
Agile software development, Lean, IBM GDF, SDLC testing and debugging

I am a reliable and committed Senior Full Stack Developer, I excel in building small to large-scale applications using PHP and Laravel. I'm open to working in an office environment or remotely, leveraging my strong leadership, strategic communication, and expertise in microservices and cloud computing. I deliver innovative, high-quality results, ensuring proactive solutions that enhance your team's productivity.

Bringing Innovation and Dedication

MYITEDU, LLC

Jan 2020 - Present

Brooklyn, NY 11234

Senior Lead Software Engineer

My primary responsibility is to lead the development and maintenance of sophisticated web applications using PHP/Laravel, leveraging advanced development tools and AWS services like Lambda for serverless computing, RDS for scalable databases, and S3 for data storage. I build secure and scalable PHP modules, ensure robust code security, design efficient databases, and optimize performance through comprehensive backend and UI testing. I lead team collaboration to meet complex data acquisition needs, ensure consistent HTML, JavaScript, and CSS standards, and maintain documentation. I'm dedicated to anticipating changes in development phases, keeping pace with industry trends and AWS innovations, communicating technical progress to stakeholders, and ensuring rigorous testing and debugging to deliver exceptional user experiences.

Healthcourse, Inc

June 2016 – July 2019

545 W 45th St #1100, New York, NY 10036

Senior Software Lead

As a Senior Software Lead, my role was divided between leadership and hands-on technical work. I dedicated 40% of my time to leading and managing my team, ensuring successful project delivery, crafting technical documents like Business Requirements Documents (BRDs), Functional Specifications Documents (FSDs), and engaging with clients on existing products and new requests. The remaining 60% was devoted to technical tasks, establishing Laravel-based LAMP stack architecture, developing web services, executing DevOps, and mentoring junior developers in adhering to industry standards. I maintained application integrity and sustainability by enforcing coding standards and procedures. My role included managing production timelines, supervising software deployments, and reporting on project statuses, while implementing ERP solutions and configuring development, QA, and production environments on AWS and Digital Ocean. I led pivotal software development initiatives, integrating Laravel with other programming languages like PHP, Python, and Shell Scripting, alongside mobile techniques. My Laravel expertise, combined with CMS solutions like WordPress and Drupal, was crucial. I managed complex databases like MySQL, PostgreSQL, and DB2, and excelled in API development. My technical expertise included deploying cloud-based services like RDS, EC2, S3, Lambda, and Docker, ensuring a robust, scalable, and highly available system architecture.

HealthPlans Services

Jan 2013 - June 2016

4110 George Road, Tampa, FL 33634

Software Engineer

In my role, I was pivotal in providing comprehensive support for Laravel and overseeing the migration of projects from a custom-built framework. My daily tasks included deploying Laravel on both local and development servers, managing updates with Composer, and establishing MySQL databases. I assisted the team with technical challenges and advocated for adherence to industry coding standards. My work spanned the full stack, from backend logic to frontend responsive designs, utilizing the latest features of frameworks and languages. Technologies I worked with included Laravel, MVC, IBM DB2, various web services, front-end languages, and tools such as Git for staging deployment and RESTful API development.

Laravel, AWS, MVC, MySQL, PHP, Web Architecture, IBM DB2, Web Services, Soap, Curl, JSON, LDAP, CSS3, Bootstrap, HTML5, JQuery, Ajax, React, XML, Database design, Unit testing, Staging deployment (Git, Dimension), CI/CD, JIRA, Slack, Docker, MariaDB, PHPUnit

IBM

June 2009 – June 2012

📍 700 Locust St, Dubuque, IA 52001

Mainframe Storage Administrator

In my capacity as a Mainframe System/Storage Administrator, I oversaw the management of databases and storage solutions within Mainframe/OS environments. This included handling backup tapes, DASD, and supervising backup jobs using tools like JCL, CA1, DFHSM, SMS, and JES, catering to the needs of over 40 IBM clients. My team excelled in distributing service requests, incidents, and change tickets to technicians based on their expertise. We were diligent in updating security protocols and ensuring HIPAA compliance, as well as participating in client meetings. We monitored ticketing systems such as Maximo 7, Remedy, and ISM, alongside IBM internal products, and managed storage KPIs for DB2 and Oracle 10-11g, utilizing the IBM GDF model and Lean methodologies. Additionally, we developed IT Service Management solutions to efficiently track and manage IT assets and service requests.

PMX Industries, Inc

Apr 2008 – June 2009

📍 5300 Willow Creek Dr SW, Cedar Rapids, IA 52404

PHP Web Developer

Crafted a diverse range of web applications for an internal clientele using open-source technologies, including interactive forums, news portals, newsletters, email list management, biography databases, and extensive document libraries. Leveraged contemporary technologies such as Linux, Apache, MySQL, PHP (LAMP) stack, MongoDB, Node.js, and modernized legacy systems to include Microsoft SharePoint and ASP.NET for enhanced functionality. Completed ISO compliance and safety training, and efficiently integrated MongoDB for superior data management and improved application performance. Data was sourced from various connectors with unique physical and mechanical specifications.

McKesson Provider Technologies

Sep 2006 - Apr 2008

📍 700 Locust St Dubuque IA 52001

Software Engineer

I provided specialized technical support for Horizon Practice Plus, HAC, and Horizon Clinicals applications, utilizing tools like VNC, Remote Desktop, and Citrix to remotely assist hospital and laboratory clients. My responsibilities also encompassed the development of a robust website and employee portal: EHR, PHP, MySQL, and Linux.

In customer support, my role was to resolve technical issues through various communication channels, meticulously documenting cases, liaising with different teams, and analyzing client data. I created and curated support resources, including documentation, training materials, and FAQs.

My technical contributions included crafting and enhancing custom web applications with PHP, MySQL, JavaScript, HTML, and CSS, leading to an enriched user experience and engagement. I was an active participant in cross-functional project delivery, ensuring efficient code reviews, testing, and debugging to uphold high-quality standards.
